

Vignette User Enablement for Vignette Content Management 7.6 Update Edition

Overview

A critical piece in achieving your business efficiency goals, Vignette User Enablement (VUE) helps ensure that your end users have the essential knowledge to support, adopt and successfully leverage your Vignette solution.

Vignette User Enablement for Vignette Content Management is your company's most valuable tool to maximize the power of your Vignette application, achieve a greater return on your technology investment, and secure a successful launch.

This Update Edition allows you to get up to speed quickly on the new features and functions of your Vignette application that directly impact business users. A full version of the course is available separately.

This training solution contains pre-built online learning that can be deployed across your entire enterprise for fast, just-in-time access to highly relevant job aids. Information is reinforced with Flash simulations, and quick-reference job aids facilitate knowledge transfer and work-embedded learning.

Designed to teach users key concepts, terminology and essential job tasks, the training provides you with:

- Information you need to be effective immediately
- Interactive simulations in relevant context that show you how to successfully accomplish each task
- Step-by-step job aids that guide you through the details of performing everyday tasks
- Opportunities to apply your knowledge and receive coaching to assure your understanding

This powerful combination of information, simulation and application delivers the right information in the right context at the right time.

Audience

Management Console users of Vignette Content Management

Training Objectives

End users will be able to:

- Identify the new features of Vignette Content 7.6
- Create Friendly URLs
